Contents of Volume 181, No. 1

FULL PAPERS

Proteins

An electron-microscope study of β-glucuronidase crystals	M. R. Dickson, M. Stewart, D. E. Hawley & C. A. Marsh	1–5
Crystal structures of hen egg-white lysozyme complexes with gadolinium(III) and gadolinium(III)–*N*-acetyl-D-glucosamine	S. J. Perkins, L. N. Johnson, P. A. Machin & D. C. Phillips	21–36
Metabolism of rabbit skin collagen. Differences in the apparent turnover rates of type-I- and type-III-collagen precursors determined by constant intravenous infusion of labelled amino acids	S. P. Robins	75–82
A simple procedure for the isolation of a major amelogenin polypeptide component	A. G. Fincham	171–175
Chemicals cross-linking of chick oviduct progesterone-receptor subunits by using a reversible bifunctional cross-linking agent	M. E. Birnbaumer, W. T. Schrader & B. W. O'Malley	201–213

Small Molecules

The interaction of calcium ions with glycocholate micelles in aqueous solution	B. W. A. Williamson & I. W. Percy-Robb	61–66
Flavin-dependent substrate photo-oxidation as a chemical model of dehydrogenase action	W. Haas & P. Hemmerich	95–105
Assay of adenosine 3′-phosphate 5′-sulphatophosphate in hepatic tissues	K. P. Wong & T. Yeo	107–110

Enzymology

The vectorial orientation of human monoamine oxidase in the mitochondrial outer membrane	S. M. Russell, J. Davey & R. J. Mayer	7–14
Immunochemical characterization of monoamine oxidase from human liver, placenta, platelets and brain cortex	S. M. Russell, J. Davey & R. J. Mayer	15–20
Purification and properties of *N*-acetylgalactosamine 6-sulphate sulphatase from human placenta	J. Glössl, W. Truppe & H. Kresse	37–46
Glutathione *S*-transferases in earthworms (Lumbricidae)	J. Stenersen, C. Guthenberg & B. Mannervik	47–50
Partial purification and properties of L-asparagine synthetase from mouse pancreas	H. A. Milman & D. A. Cooney	51–59
Comparison of human alkaline phosphatase isoenzymes. Structural evidence for three protein classes	M. J. McKenna, T. A. Hamilton & H. H. Sussman	67–73
Lipoprotein lipase activity of rat cardiac muscle. The intracellular distribution of the enzyme between fractions prepared from cardiac muscle and cells isolated from the hearts of fed and starved animals	P. Chohan & A. Cryer	83–93
Preparation and properties of amphipathic enzyme–polymer conjugates	R. A. G. Smith	111–118
Differences between microsomal and mitochondrial-matrix palmitoyl-coenzyme A hydrolase, and palmitoyl-L-carnitine hydrolase from rat liver	R. Kr. Berge & B. Døssland	119–125

Some molecular properties of NAD(P)H dehydrogenase from rat liver	R. WALLIN	127–135
Evidence for the importance of arginine residues in pig kidney alkaline phosphatase	M. N. WOODROOFE & P. J. BUTTERWORTH	137–142
Inhibition of rat liver mevalonate pyrophosphate decarboxylase and mevalonate phosphate kinase by phenyl and phenolic compounds	C. SHAMA BHAT & T. RAMASARMA	143–151
Steady-state investigation of the mechanism of histidinol dehydrogenase	H. GÖRISCH	153–157
Isolation and properties of cytochrome *c* peroxidase from *Pseudomonas denitrificans*	A. F. W. COULSON & R. I. C. OLIVER	159–169
Intermediate dehydrogenase–oxidase form of xanthine oxidoreductase in rat liver	Z. W. KAMIŃSKI & M. M. JEŻEWSKA	177–182
Multiple deoxyribonucleic acid polymerases from quiescent wheat embryos. Purification and characterization of three enzymes from the soluble cytoplasm and one from purified mitochondria	M. CASTROVIEJO, D. THARAUD, L. TARRAGO-LITVAK & S. LITVAK	183–191
Factors effecting the onset of deoxyribonucleic acid synthesis during wheat embryo germination. Study of the changes in DNA polymerases A, B and C and the pool of DNA precursors	M. CASTROVIEJO, D. THARAUD, B. MOCQUOT & S. LITVAK	193–199
Biosynthesis of proline in *Pseudomonas aeruginosa*. Partial purification and characterization of γ-glutamyl kinase	R. V. KRISHNA & T. LEISINGER	215–222
Biosynthesis of proline in *Pseudomonas aeruginosa*. Properties of γ-glutamyl phosphate reductase and 1-pyrroline-5-carboxylate reductase	R. V. KRISHNA, P. BEILSTEIN & T. LEISINGER	223–230
Immunochemically identical hydrophilic and amphiphilic forms of the bovine adrenomedullary dopamine β-hydroxylase	O. J. BJERRUM, K. B. HELLE & E. BOCK	231–237

RAPID PAPERS

Proteins

Dansylation of human serum albumin in the study of the primary binding sites of bilirubin and L-tryptophan	C. JACOBSEN & J. JACOBSEN	251–253

Carbohydrates

On the molecular-weight-dependence of the anticoagulant activity of heparin	L. THUNBERG, U. LINDAHL, A. TENGBLAD, T. C. LAURENT & C. M. JACKSON	241–243

Enzymology

Localization of the heparin-releasable lipase *in situ* in the rat liver	T. KUUSI, E. A. NIKKILÄ, I. VIRTANEN & P. K. J. KINNUNEN	245–246
Inhibition of human alkaline phosphatases by vanadate	L. E. SEARGEANT & R. A. STINSON	247–250
A comment on the 'jack-knife' technique for analysing enzyme-kinetic data	R. G. DUGGLEBY	255–256

Contents of Volume 181, No. 2

FULL PAPERS

Proteins

The polypeptides of isolated brain 10nm filaments and their association with polymerized tubulin	R. THORPE, A. DELACOURTE, M. AYERS, C. BULLOCK & B. H. ANDERTON	275–284
Genetics of the mammalian phenylalanine hydroxylase system. Studies of human phenylalanine hydroxylase subunit structure and of mutations in phenylketonuria	K. H. CHOO, R. G. H. COTTON, D. M. DANKS & I. G. JENNINGS	285–294
The electrophoretically 'slow' and 'fast' forms of the α_2-macroglobulin molecule	A. J. BARRETT, M. A. BROWN & C. A. SAYERS	401–418
An analysis of the polypeptide composition of bovine heart mitochondrial NADH–ubiquinone oxidoreductase by two-dimensional polyacrylamide-gel electrophoresis	C. HERON, S. SMITH & C. I. RAGAN	435–443
Structure of the anion-transport protein of the human erythrocyte membrane. Further studies on the fragments produced by proteolytic digestion	D. G. WILLIAMS, R. E. JENKINS & M. J. A. TANNER	477–493

Lipids

Medium-chain fatty acid synthesis in lactating-rabbit mammary gland. Intracellular concentration and specificity of medium-chain acyl thioester hydrolase	J. KNUDSEN	267–274
Changes in the acyl lipid composition of photosynthetic bacteria grown under photosynthetic and non-photosynthetic conditions	N. J. RUSSELL & J. L. HARWOOD	339–345

Carbohydrates

Transfer of carbohydrates on to nascent glycoprotein of vesicular stomatitis virus	J. KRUPPA	295–300
^{1}H Nuclear-magnetic-resonance spectra of the methyl group of the acetamido moiety and the structure of acid glycosaminoglycans in solution	J. E. SCOTT & F. HEATLEY	445–449
Differences between the carbohydrate units of cell-surface glycoproteins of mouse B- and T-lymphocytes	T. KRUSIUS, J. FINNE, L. C. ANDERSSON & C. G. GAHMBERG	451–456

Small Molecules

Isolation, properties and structural studies on a compound from tunicate blood cells that may be involved in vanadium accumulation	I. G. MACARA, G. C. MCLEOD & K. KUSTIN	457–465

Enzymology

The role of subunits in yeast DNA-dependent ribonucleic acid polymerase A	C. S. COOPER & R. V. QUINCEY	301–308
Interaction of phosphorylase *b* with eosin. Influence of substrates and effectors on eosin–enzyme complexes	N. G. OIKONOMAKOS, T. G. SOTIROUDIS & A. E. EVANGELOPOULOS	309–320
Isolation and partial characterization of magnesium ion- and calcium ion-dependent adenosine triphosphatase activity from bovine brain microsomal fraction	T. SÆRMARK & H. VILHARDT	321–330

Isolation, characterization and the role of rabbit testicular arylsulphatase A in fertilization	A. A. Farooqui & P. N. Srivastava	331–337
Separation and purification of the alkaline phosphatase and a phosphodiesterase from *Halobacterium cutirubrum*	P. S. Fitt & P. Baddoo	347–353
The development of *SS'*-polymethylenebis(methanethiosulphonates) as reversible cross-linking reagents for thiol groups and their use to form stable catalytically active cross-linked dimers within glyceraldehyde 3-phosphate dehydrogenase	D. P. Bloxham & R. P. Sharma	355–366
Detergent activation and solubilization of 2′:3′-cyclic nucleotide 3′-phosphodiesterase from isolated myelin and C_6 cells	N. R. Sims, L. B. Horvath & P. R. Carnegie	367–375
Neuraminidase inhibition by chemically sulphated glycopeptides	N. Mian, C. E. Anderson & P. W. Kent	377–385
Effect of *O*-sulphate groups in lactose and *N*-acetylneuraminyl-lactose on their enzymic hydrolysis	N. Mian, C. E. Anderson & P. W. Kent	387–399
Amino acid sequences around the sites of phosphorylation in the pig heart pyruvate dehydrogenase complex	P. H. Sugden, A. L. Kerbey, P. J. Randle, C. A. Waller & K. B. M. Reid	419–426
Regulation of kinase reactions in pig heart pyruvate dehydrogenase complex	A. L. Kerbey, P. M. Radcliffe, P. J. Randle & P. H. Sugden	427–433
The reaction of rabbit muscle creatine kinase with diethyl pyrocarbonate	D. E. Clarke & N. C. Price	467–475
Intermolecular Organization		
Permeability of composite chondrocyte-culture–Millipore membranes to solutes of varying size and shape	G. J. Cumming, C. J. Handley & B. N. Preston	257–266

RAPID PAPERS

Proteins		
Crystallization of the Fv fragment of mouse myeloma protein M315	R. Aschaffenburg, D. C. Phillips, D. R. Rose, B. J. Sutton, S. K. Dower & R. A. Dwek	497–499
Analysis of met-form haemoglobins in human erythrocytes of normal adults and of a patient with hereditary methaemoglobinaemia due to deficiency of NADH–cytochrome b_5 reductase	A. Tomoda, M. Imoto, M. Hirano & Y. Yoneyama	505–507
Nucleic Acids		
High-molecular-weight nuclear polyadenylate-containing ribonucleic acid isolated from the lactating guinea-pig mammary gland contains milk-protein messenger ribonucleic acid sequences	I. C. Bathurst, R. K. Craig & P. N. Campbell	501–504
Enzymology		
Purification and properties of nitrogenase in ethylene glycol at sub-zero temperatures	A. D. Tsopanakis, R. C. Bray & B. E. Smith	509–512

Contents of Volume 181, No. 3, 1979

NOMENCLATURE DOCUMENT

Nomenclature of iron-sulphur proteins 513–516

FULL PAPERS

Proteins

Localization by immunofluorescence and by light- and electron-microscopic immunoperoxidase techniques of Tamm–Horsfall glycoprotein in adult hamster kidney — K. L. Sikri, C. L. Foster, F. J. Bloomfield & R. D. Marshall — 525–532

Properties of allophycocyanin II and its α- and β-subunits from the thermophilic blue–green alga *Mastigocladus laminosus* — J. R. Gysi & H. Zuber — 577–583

Studies on the high-mobility-group non-histone proteins from hen oviduct — C. S. Teng, G. K. Andrews & C. T. Teng — 585–591

Further studies on the structural requirements for polypeptide-mediated histamine release from rat mast cells — B. Jasani, G. Kreil & D. R. Stanworth — 623–632

Bi- and tri-antennary human transferrin glycopeptides and their affinities for the hepatic lectin specific for asialoglycoproteins — M. W. C. Hatton, L. März, L. R. Berry, M. T. Debanne & E. Regoeczi — 633–638

Native cross-links in collagen fibrils induce resistance to human synovial collagenase — C. A. Vater, E. D. Harris, Jr. & R. C. Siegel — 639–645

The isolation and partial sequence of peptides produced by cyanogen bromide cleavage of calf thymus non-histone chromosomal high-mobility-group protein 2. Sequence homology with non-histone chromosomal high-mobility-group protein 1 — J. M. Walker, K. Gooderham & E. W. Johns — 659–665

Biochemical characterization of guanidinium chloride-soluble dentine collagen from lathyritic-rat incisors — M. Wohllebe & D. J. Carmichael — 667–676

Identification of two lithocholic acid-binding proteins. Separation of ligandin from glutathione S-transferase B — J. D. Hayes, R. C. Strange & I. W. Percy-Robb — 699–708

The binding of ferric iron by ferritin — A. Treffry & P. M. Harrison — 709–716

The role of disulphide bonds in human intestinal mucin — J. F. Forstner, I. Jabbal, R. Qureshi, D. I. C. Kells & G. G. Forstner — 725–732

Nucleic Acids

Studies on the intracellular segregation of polyribosome-associated messenger ribonucleic acid species in the lactating guinea-pig mammary gland — R. K. Craig, A. P. Boulton, O. S. Harrison, D. Parker & P. N. Campbell — 737–756

Carbohydrates

Multiplicity of molecules carrying blood-group-I antigen on erythrocyte membranes — R. A. Childs, T. Feizi & Y. Tonegawa — 533–538

Structural studies on the major component of *Gladiolus* style mucilage, an arabinogalactan-protein — P. A. Gleeson & A. E. Clarke — 607–621

An interaction between lysozyme and mucus glycoproteins. Implications for density-gradient separations — J. M. Creeth, J. L. Bridge & J. R. Horton — 717–724

Enzymology

Structural aspects of the dye-linked alcohol dehydrogenase of *Rhodopseudomonas acidophila* — C. W. Bamforth & J. R. Quayle — 517–524

The temperature-dependence of adenylate cyclase from baker's yeast — J. Londesborough & K. Varimo — 539–543

Isolation and partial characterization of three acidic proteinases in erythrocyte membranes — S. Pontremoli, F. Salamino, B. Sparatore, E. Melloni, A. Morelli, U. Benatti, & A. De Flora — 559–568

Characterization of an oxygen-stable nitrogenase comples isolated from *Azotobacter chroococcum* — R. L. Robson — 569–575

Purification and characterization of NADPH-cytochrome *c* reductase from the midgut of the southern armyworm (*Spodoptera eridania*) — D. L. Crankshaw, K. Hetnarski & C. F. Wilkinson — 593–605

Properties of mammalian nuclear-envelope nucleoside triphosphatase — P. S. Agutter, J. B. Cockrill, J. E. Lavine, B. McCaldin & R. B. Sim — 647–658

Multiple forms of 2-deoxy-D-glucoside-2-sulphamate sulphohydrolase from human placenta — E. Paschke & H. Kresse — 677–684

Subcellular distribution of Δ^5-3β-hydroxy steroid dehydrogenase in the granulosa cells of the domestic fowl (*Gallus domesticus*) — D. G. Armstrong — 685–689

Reinvestigation of the reaction of chymotrypsin with *N*-furylacryltryptophan derivatives at acidic pH — A. L. Fink, R. Feldman & J. Zehnder — 733–736

Intermolecular Organization

Interaction of di-iodinated ^{125}I-labelled α-bungarotoxin and reversible cholinergic ligands with intact synaptic acetylcholine receptors on isolated skeletal-muscle fibres from the rat — P. Darveniza, J. A. Morgan-Hughes & E. J. Thompson — 545–557

General Methods

Affinity chromatography of human plasma low- and high-density lipoproteins. Elution by selective cleavage of a bond in the spacer — A. Wichman — 691–698

RAPID PAPERS

Proteins

The oxidation–reduction potentials of cytochrome $o+c_4$ and cytochrome *o* purified from *Azotobacter vinelandii* — T. Yang, D. O'Keefe & B. Chance — 763–766

Nucleic Acids

The sensitivity of *Mycoplasma mycoides* var. *capri* cells to γ-radiation after growth in a medium containing the thymine analogue, 5-vinyluracil — E. T. J. Chelton, A. S. Jones & R. T. Walker — 783–785

Small Molecules

Photoactivated covalent binding of [^{3}H]bilirubin to human serum albumin — D. W. Hutchinson & D. S. Mutopo — 779–781

Enzymology

Delineation of fucosyltransferase activities with thiol reagents — D. KESSEL & T.-H. CHOW — 767–769

The catalytically active form of histidinol dehydrogenase from *Salmonella typhimurium* — E. BÜRGER, H. GÖRISCH & F. LINGENS — 771–774

The equilibrium assumption is valid for the kinetic treatment of most time-dependent protein-modification reactions — K. BROCKLEHURST — 775–778

General Methods

Dodecyl sulphate/polyacrylamide-gel electrophoresis at low pH values and low temperatures — R. LICHTNER & H. U. WOLF — 759–761
